Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is a first action in response to application no. 09/986,663 filed on November 9, 2001 in which claims 1-15 are presented for examination.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Robinson (US Patent no. 6433683).

Art Unit: 2613

Regarding claims 1-4, Robinson discloses a surveillance system for confirming a state of a house (See fig. 2, and Abstract), comprising a mobile terminal owned by a user (See fig. 1, item 42, and col. 6, lines 26-33), a camera and a sensor mounted on a pad of the house (See fig. 2, camera 20 and sensor 16), which is specified by the user, an information processing unit operable to transmit (See fig. 2, item 14, and col. 6, lines 14-18 and lines 29-33), when said sensor senses unusual event information, a text message and an image photographed by the camera corresponding to the unusual event information to said mobile terminal (See col. 6, lines 66-67, and col. 7, lines 1-10). The applicant should note that the code alarm received at the transceiver is a text message.

As per claim 5, most of the limitations of this claim have been noted in the above rejection of claims 1-4. In addition, Robinson's microprocessor inherently contains a memory unit that cumulatively stores not only the alarm codes, the programs, but also the images (See col. 6, lines 14-22).

As per claims 6-10, most of the limitations of these claims have been noted in the above rejection of claims 1-5. In addition, Robinson further provides an electrical power distribution of a power company (See Robinson fig. 1, AC power 26, and col. 6, lines 10-15).

Art Unit: 2613

As per claims 11-15, most of the limitations of these claims have been noted in the above rejection of claims 1-5. In addition, Robinson further provides an RF transmission device 12 of fig. 2 which is used as a gateway as seen in col. 6, lines 9-52).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kim (US Patent no. 6108034) teaches remote image information monitor.

Seeley et al. (US Patent no. 6069655) teaches advanced video security system.

Monroe (US Patent no. 6545601) teaches ground based security surveillance system for aircraft and other commercial vehicles.
